## Flying Pig Success

This year's Flying Pig Marathon took place the first weekend of May, and the race was a resounding success! We would like to thank all those who supported this fundraising event by purchasing a raffle ticket or through a donation. \$4,000 was raised through donations and \$3,470 was raised through the sale of 694 raffle tickets. All funds will be used to support this summer's Undergraduate Research Education Program.

# Newport's East Row Historic District Supports UREP Students

NEWPORT, KY

## EAST·ROW

HISTORIC DISTRICT

The East Row Historic District of Newport, Kentucky, is the second largest historic district in the Commonwealth of Kentucky, created by joining the two districts Mansion Hill and Gateway. The East Row Historic Foundation is a Non-Profit organization with the mission of bettering the neighborhood by promoting historic preservation, civic engagement, and social events. This spring, they have chosen to support breast cancer research and local students in the community with a generous grant of \$2000 for our Undergraduate Research Education Program (UREP). This grant will fund student salaries, and matching funds of \$2000 will be supplied by the lab for research supplies. Wood Hudson Cancer Research Laboratory currently has five students having an experiential learning experience in our laboratory, continuing the educational mission of the Corpus Christi school in this neighborhood. Breast cancer is a leading cause of death in women in Northern Kentucky and elsewhere in the US. Many former UREP students have become physicians, nurses, and teachers now serving our community.

## Two Gatton Academy Students to Participate in Summer 2023 UREP

This summer, our Undergraduate Research Education Program (UREP) will include two students from the Gatton Academy of Mathematics and Science. Students attending their last two years of high school at Gatton Academy earn college credits at Western Kentucky University. Their salaries will be supported in part by a generous grant from WKU's College Heights Foundation. Gatton Academy students have been participating in Wood Hudson's UREP program for over ten years. Many of the Gatton Academy students have gone on to careers in science and medicine. Students come from all across Kentucky to The Gatton Academy on the campus of Western Kentucky University, enrolling at WKU during their junior and senior years in high school to pursue interests, education, and careers in advanced science, technology, engineering, and mathematics.

## **National Cancer Research Month**

The month of May is National Cancer Research Month. Initiated by the American Association for Cancer Research (AACR), this event highlights the importance of lifesaving research to the millions of people around the world affected by cancer. Through recent advances in treatment, more than 18 million people in the United States and millions more worldwide are cancer survivors who are living with, through, and beyond their disease. Wood Hudson Cancer Research Laboratory is a 501(c)3 Non-Profit Organization dedicated to the discovery of new knowledge regarding the causes, diagnosis, treatment, and prevention of cancer. With your help, we are working towards the conquest of cancer through research.
