

## *February E-News*

# Wood Hudson at Give Camp 2026

Wood Hudson was selected to participate in Give Camp 2026, an initiative that connects nonprofit organizations with volunteer IT professionals. During the weekend of February 20–22, the team worked to modernize the Wood Hudson website, which has been challenging to maintain given that it must continue on its current platform. The primary goal was to make the site more user friendly so staff without computer programming experience are also to update it on a regular basis.

It was a pleasure to work with the Give Camp team led by David McCoy of Ingage Partners. Wood Hudson is grateful for the generous support of the expert volunteers and corporate sponsors who made this weekend possible. The website refresh will move us forward, and while a few technical issues are still being addressed, the work completed sets a solid foundation for future improvements. Look for this update in the coming months.

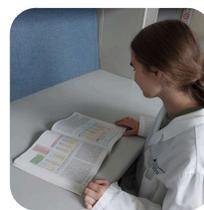

Wood Hudson also extends special thanks to Daniel Booth, a co-op student from the University of Cincinnati funded through a Ride Cincinnati grant, who provided valuable support throughout the weekend. His involvement will continue to support the technical work completed by the Give Camp team.

## **Board Spotlight: Joshua Goble, J.D.**

Joshua Goble joined the Wood Hudson Cancer Research Laboratory Board of Trustees last year. He brings more than eight years of legal experience including estate planning, probate, business law, real estate, and civil litigation. Raised in the Appalachian town of Inez, Kentucky, Joshua developed a strong foundation rooted in hard work that continues to guide his professional practice and community involvement.

He earned his Juris Doctorate from Northern Kentucky University's Salmon P. Chase College of Law and was a member of The W. Bruce Lunsford Academy for Law, Business and Technology. Joshua completed his Bachelor of Arts in Philosophy at Morehead State University, where he graduated with honors and received the George M. Luckey, Jr. Academic Honors Scholarship. In his free time, Joshua enjoys hiking, fishing, and spending time with his family.

## **Now recruiting Summer 2026 UREP students**

We are excited to offer the Summer 2026 Undergraduate Research Education Program (UREP), running May 18, 2026 through July 31, 2026. Dr. Mary Kate Gehret will serve as the lead instructor with Dr. Zac Taylor, faculty member at Thomas More University, returning as an instructor. Guided by expert researchers, UREP students will learn about cancer biology along with cell culture, western blotting, cell viability

assays, clinical trials, and bioinformatics. In addition, this year we are adding a cancer advocacy and support component. Students who are interested are encouraged to apply using this Google form:

---

## Thank you for your support!

As mentioned in the last e-News, we raised a **total of \$130,500** during our 45th anniversary matching campaign, \$10,000 more than the original goal. Thank you for your ongoing support of cancer research along with current and future scientists.

*—With sincere gratitude from our Board of Trustees, Staff, and Students*
